

RPA Developer - Beginner Certification Test

Multiple Choice

1) Which activity can be used if you want to test whether a condition evaluates to true or false?

- If activity
- For Each activity
- Flow Decision activity

Multiple Choice

2) Where can you find the value written by the Write Line activity?

- In a variable
- In the Output pane
- At console

Multiple Choice

3) Which activity can you use if you want to loop through a collection of items?

- If activity
- Flow Decision activity
- For Each activity
- Assign activity

Multiple Choice

4) How can you extract text from a Citrix application?

- Using the Screen Scraping wizard with FullText method
- Using the shared clipboard
- Using Microsoft OCR

Multiple Choice

5) What is an argument?

- An input/output parameter of the workflow
- A variable
- A variable type

Multiple Choice

6) How can UiPath identify an UI element on the screen?

- By using a full selector
- By using a partial selector inside a container
- By using a reference of it, previously saved in a variable

Multiple Choice

7) What happens if the AddHeaders property is checked for the Read Range Activity?

- An exception is thrown
- The first row from the specified range is considered to be the column header
- A new row is added to the Excel sheet
- Nothing

Multiple Choice

8) How can you install and update activity packs?

- In Package Pane
- Using Manage Packages within Activities Pane
- Using TFS

Multiple Choice

9) What kind of workflow should you create to define business rules?

- Sequence
- Flowchart
- State machine

Single Choice

10) How many characters does "*" replace?

- One
- Zero or more
- Zero
- More than one

Multiple Choice

11) How can you automate a Citrix application?

- Using images
- Using text
- Using the keyboard

Multiple Choice

12) There is an input field with the text "abc". If you use the Type activity with the text "123" and the following Properties: SimulateType checked, EmptyField unchecked, what will be the text in the field?

- abc
- 123
- abc123

Multiple Choice

13) How do you exit the selection mode?

- F2
- ESC
- Right click
- F3

Single Choice

14) Can you insert a Flowchart activity in a Sequence activity?

- True
- False

Single Choice

15) Is it possible to make an image automation if you are not in a Citrix environment?

- No, image automation is only for remote automation
- Yes, but should be used as last resort

Multiple Choice

16) How can you fine tune a selector?

- Making sure you have an idx attribute
- Replacing variable attribute parts with *
- Adding all parents

Multiple Choice

17) How should you organize your workflow?

- Never break the automation into smaller pieces
- Ignore exceptions
- Use Flowchart or State Machine for a high level organization

Multiple Choice

18) What is the technique used to indicate an item from a popup menu that disappears on click?

- Region selection
- Delayed selection
- Element selection

Multiple Choice

19) What should you use to check if a checkbox is selected or cleared?

- Check activity
- Get Attribute activity
- A trigger activity
- Click activity

Multiple Choice

20) What is UiExplorer used for?

- UiExplorer is not part of UiPath
- To explore the workflow tree
- To explore the UI tree
- To create and fine tune selectors

Multiple Choice

21) What would you use to exit from a For Each activity and continue the execution of the workflow?

- Terminate Workflow activity
- If activity
- Break activity

Single Choice

22) What is the Attach Window activity used for?

- To specify the top-level window container you will be working with
- To specify the browser container you will be working with
- Specifies that you are working with a java window

Multiple Choice

23) Which of the following activities can you use to extract text from a hidden browser?

- Get Visible Text
- Get Full Text
- Extract Structured Data
- Get Text

Multiple Choice

24) If you scrape some text and you know it contains only digits, how can you make the scrape better?

- Use Google OCR with the "Numbers Only" option
- Make sure the background is dark
- Use Get Text for the field in the Citrix Window

Multiple Choice

25) How can you filter records from a DataTable based on a condition?

- Using the Clear Data Table activity
- Using the 'Select' method
- Using the Format Value activity
- Checking the condition in a For Each Row loop

Multiple Choice

26) What activity can be used to read an entire sheet from a excel file?

- Read Cell
- Write CSV
- Read Range
- Get Table Range

Multiple Choice

27) What is TimeoutMS property used for?

- To make sure that the workflow continues even if the activity fails
- To define the amount of time in which the target of an activity must be found
- To define the amount of time used to execute the activity

Single Choice

28) A Click Trigger has the EventType = EVENT_SYNCHRONOUS. The activities in the Event Handler are executed before the click is sent to the application

- True
- False

Multiple Choice

29) What text extraction method can you use to get text position?

- FullText
- OCR
- Native
- Shared Clipboard

Multiple Choice

30) Which recording profile generates full selectors?

- Step by step recording
- Basic recording
- Desktop recording

Multiple Choice

31) Which activity should you use to Click on a specified text in a Citrix Environment?

- Click OCR Text
- Click Text
- Hover Text

Multiple Choice

32) How can you find all anchor elements in a web page?

- Using the Find Children activity
- Using the Find element activity
- Using the Find Relative Element activity

Multiple Choice

33) Which of the following input methods works in background?

- Hardware event
- Window Messages
- Simulate Type/Click
- Native

Multiple Choice

34) Which activities can be used to interact with the user?

- MessageBox
- InputDialog
- WriteLine

Multiple Choice

35) What should you use to click in a hidden IE browser?

- Click text
- Cursor Position : Center
- SimulateClick
- Default click activity

Multiple Choice

36) What is a wildcard used for?

- To get text from screen
- To select items in a list
- To replace variable values in selector attributes

Multiple Choice

37) When is it recommended to use containers?

- When performing one action per window
- When performing multiple operations in the same window
- When the Basic Recorder profile is used

Multiple Choice

38) Which of the scraping methods can get you the hidden text in the element?

- Native
- FullText
- OCR
- All of the above

Multiple Choice

39) How can you identify a column in a DataTable?

- Using the column name
- Using the row index
- Using the column index
- Using the column default value

Multiple Choice

40) When should you use the Flowchart workflow?

- When having multiple activities executed in a fixed order
- When having a process with many decision blocks
- When modelling a process that has loops to previous states

Multiple Choice

41) What activity can you use to get a column value from a specific row of a DataTable?

- Get Row Item
- Remove Data Row
- Read Cell

Multiple Choice

42) How does UiPath recognize elements on screen?

- Using coordinates
- Using the position of the UI elements
- Using attributes of the UI elements

Multiple Choice

43) What should you use to make sure that the workflow continues no matter what activity fails?

- TimeoutMS property
- Try Catch activity
- ContinueOnError property

Multiple Choice

44) Where can you see the activities that make up a workflow?

- In the Activities pane
- In the Workspace pane
- In the Outline pane

Multiple Choice

45) What should you use to scrape tables from a web page?

- Get OCR text
- Data Scraping
- Get Text
